

Basic Army Leader Course Substitution for LAMS

as of 3Mar22

The Basic Army Leader Course is now approved as an authorized substitution for LAMS and satisfies the Service Wide eligibility requirements that the completion of LAMS would provide. This course is exclusively a unit-funded opportunity. It is imperative that enrollment, waiver requests, and all communications with PPC and CG-128 are initiated as early as possible during the applicable Service Wide season.

It is the responsibility of the member's Command to coordinate the enrollment, funding, and all associated logistics. Once the member completes the course, the certificate and documentation should be forwarded to MKCS Wilson in CG-128 as well as Mr. David Lynch and YNC Munroe in PPC. There is no course code associated with this course, and PPC will recommend that the unit enters the completion as 'LAMS' for the time being.

To be eligible to compete in the E-6 Service Wide, the member will request a waiver from CG-128. Once the waiver is approved and granted, CG-128 will forward to PPC where the manual entry will be made; and the Service Wide eligibility recorded. It is the responsibility of the member and their Command to ensure that this process is followed through, and communications are kept up.

As with our other LAMS Authorized Substation already in place, CG-128 strongly encourages all who have received a waiver and credit for these courses, to pursue a seat in LAMS at the earliest opportunity to prepare for the next level of formal leadership within the Coast Guard Enlisted Leadership Continuum.

We look forward to being able to support this Sister Service leadership training relationship, and to offer an authorized alternative within our robust training portfolio.
