Locating Specific Units within the Spreadsheet

The spreadsheet is a living document that requires continuous maintenance and update to accurately reflect the areas of responsibility (AORs) for each FRS. The spreadsheet is a rather large document with a lot of data. Personnel may find it more efficient and easier to use the “Find” feature in Word to locate specific units or states. To search for a specific unit or state within the spreadsheet, personnel can follow the steps below.

Step	Action
1	On the spreadsheet, click the column that corresponds to the type of unit (e.g., cutter, boat station, sector, etc.) of interest. (If searching for a specific state, click column “B”, titled “States”.) When clicking on a column, ensure that the entire column is selected (i.e., highlighted).
2	From the Home tab, select the Find & Select icon.

3	From the Find & Select menu, select Find .																								
	In the Find what: text box, enter the name of the unit or state.
