

COAST GUARD CUTTERS CONSTRUCTED PRIOR TO 1991 AND IN SERVICE FROM 1990 TO 2017

Coast Guard cutters constructed prior to 1991 are known to have asbestos materials (asbestos-containing thermal insulating material and/or asbestos-containing floor tiles) and lead (lead-based paint and/or lead ballast ingots). Routine exposures for asbestos and lead would have occurred for Coast Guard members who worked on and berthed in these cutters.

Exceptional exposures may have occurred during certain maintenance procedures (e.g. tearing up entire floor surfaces of asbestos-containing floor tiles and torching or sanding surfaces painted with lead-containing paint) without the use of personal protective equipment.

The following list of Coast Guard cutters constructed prior to 1991 and in-service from 1990 to 2017 is provided for purposes of helping to identify cutters on which Coast Guard veterans and retirees may have served.
