

Photo of new health record jacket set up. No stickers should cover the front of the jacket, with the exception of the EPIC label once available. Allergies must be current and verified on the 2766 and the HIPAA statement should be printed out for patient signature and filed in the record.

The last four numbers of the 10 digit EDIPN available in DEERS or on the back of the CAC must be placed utilizing the color coded stickers (order number available in the previous AIG), but the other numbers can either be the color coded stickers or hand written.
