

10th C-27J Spartan Completes Regeneration

The Coast Guard HC-27J Asset Project Office in Elizabeth City, North Carolina, received the service's 10th regenerated C-27J Spartan medium range surveillance aircraft Dec. 11, 2016. Regeneration is the process of inspecting, verifying and repairing the aircraft for flight clearance and is completed by the 309th Aerospace Maintenance and Regeneration Group on Davis-Monthan Air Force Base in Tucson, Arizona. The Coast Guard will regenerate 13 aircraft under this program. The 14th C-27J in the acquisition program of record will come directly from the contractor and is scheduled for delivery later this month. U.S. Coast Guard photo..
