

### **Coast Guard Establishes HC-130J Minotaur Fleet Integration Team**

The Coast Guard established a fleet integration team for the HC-130J missionization at the L-3 Communications Integrated Systems Platform Integration Division in Waco, Texas, July 20, 2016. The FIT will directly oversee the installation of the new Minotaur mission system architecture on up to five baseline HC-130J aircraft and seven HC-130J aircraft outfitted with the legacy mission system package. The nine-member team will act with oversight from the long range surveillance aircraft program office at Coast Guard headquarters and technical advice from the Aviation Logistics Center to ensure adherence to contractual agreements and proper maintenance techniques.
