

## **HC-27J APO Publishes Spartan Flight Manual**

The Coast Guard's HC-27J Asset Project Office developed and published the official flight manual for the service's new C-27J Spartan medium range surveillance aircraft. The procedures published in the manual and related checklists are a culmination of previously established C-27J procedures adapted to Coast Guard aviation missions and assure standardized training and operation. The effort was led by the APO staff in close collaboration with Aviation Training Center Mobile, Alabama, and the manual was promulgated through the Coast Guard's Office of Aviation Forces.
