

Sixth Coast Guard C-27J Spartan Completes Regeneration

The Coast Guard HC-27J Asset Project Office in Elizabeth City, North Carolina, received the service's sixth regenerated C-27J Spartan medium range surveillance aircraft April 22, 2016. Regeneration – the extensive process of inspecting, verifying and repairing the aircraft before it can be certified as airworthy – is completed by the 309th Aerospace Maintenance and Regeneration Group on Davis-Monthan Air Force Base in Tucson, Arizona. The APO flew CGNR 2709 to Air Station Sacramento, California, May 8 to support training of Coast Guard aircrew and maintenance personnel there. A seventh Spartan has started the regeneration process; the Coast Guard will regenerate 13 C-27Js under this program. U.S. Coast Guard photo.
