

SILC Shore Transition Assistant Team Assists HITRON

- In June 2025, the Coast Guard took over facility maintenance responsibilities for the Helicopter Interdiction Unit (HITRON) in Jacksonville, Florida. To support this new requirement, the SILC's Shore Transition Asset Team (STAT) sprang into action. The team enrolled 683 equipment components across two hangars and an administrative building, created follow-on preventative maintenance plans, and developed a SharePoint site for the Unit with Operations and Maintenance manuals, pictures, and guides.
- **STAT's efforts enabled HITRON to focus on operations and saved the Coast Guard over \$35,000 in contracting costs.**
- STAT's proactive approach highlights SHORE's commitment to operational readiness, cost efficiency, and mission success for Coast Guard units.
